JOURNAL OF THE AERONAUTICAL SCIENCES

Index to Volume 3

SEPTEMBER 1935 — OCTOBER 1936

NUMBERS 1 – 12

Published by the

INSTITUTE OF THE AERONAUTICAL SCIENCES, INC.

5431 RCA BUILDING

30 ROCKEFELLER PLAZA

NEW YORK CITY

JOURNAL OF THE AERONAUTICAL SCIENCES

Editor: J. C. HUNSAKER, *Massachusetts Institute of Technology*

PUBLISHED MONTHLY BY THE INSTITUTE OF THE AERONAUTICAL SCIENCES, INC.
AT 99–129 NORTH BROADWAY, ALBANY, NEW YORK

The JOURNAL OF THE AERONAUTICAL SCIENCES is the official publication of the Institute of the Aeronautical Sciences, Inc., and prints papers of scientific and technical interest to members and subscribers. In general, it provides an opportunity for members to publish articles disclosing new knowledge and new applications in the field of the aeronautical sciences. The Journal prints a few complete professional papers in each issue and a larger number of short notes and critical comments. The Journal restricts itself to the aeronautical aspects of advances in science and engineering. New knowledge in physics, metallurgy, meteorology, etc., having aeronautical applications is reported and discussed in the Journal. Papers read at meetings of the Institute are presented in full or digested. Reviews of aeronautical literature and a digest of current aircraft books and magazines form a section of the publication. The news of the Institute is furnished members through the Journal.

SUBSCRIPTION RATES

United States and Possessions		Foreign Countries, Including Canada	
1 Year	$5.00	1 Year	$6.00
Single Copies	.50	Single Copies	.60

Manuscripts for publication, proofs, and all correspondence should be addressed to the Editorial Secretary of the JOURNAL.

Correspondence regarding subscriptions may be addressed to Publication Office, 99–129 North Broadway, Albany, N. Y., or to the Editorial Office of the JOURNAL OF THE AERONAUTICAL SCIENCES, 5431 R. C. A. Building, Rockefeller Center, New York, New York. Cable Address: INSAEROSCI.

JOURNAL OF THE AERONAUTICAL SCIENCES

INDEX TO

Volume 3, Numbers 1–12, September 1935–October 1936.

No. 1, September 1935, pages 1–34. No. 5, March 1936, pages 145–190. No. 9, July 1936, pages 305–342.
No. 2, November 1935, pages 35–72. No. 6, April 1936, pages 191–228. No. 10, August, 1936, pages 343–380.
No. 3, January 1936, pages 73–108. No. 7, May 1936, pages 229–266. No. 11, September 1936, pages 381–418.
No. 4, February 1936, pages 109–144. No. 8, June 1936, pages 267–304. No. 12, October 1936, pages 419–456.

All material which has appeared in the above volume has been indexed under a general subject heading and by author, and has been further cross-indexed under various specialized sub-headings.

Aeronautical Reviews 70, 183, 222, 260, 299, 338, 375, 413, 451

Aerodynamics —

An Air Spoiler, A. A. Merrill 291
An Airfoil Fitted With a Slotted Flap, George J. Higgins 431
The Boundary Layer and the Drag of a Body of Revolution at Large Reynold's Number, C. C. Fediaevsky 17
Calculation of the Motion of an Airplane Under the Influence of Irregular Disturbances, Robert T. Jones 419
On the Common Space Integrals of Aerodynamics, Max M. Munk 243
Equipment for Laboratory Instruction in Aerodynamics, K. G. Merriam 353
Effect of Horizontal Variations in Center of Gravity Position on the Static Longitudinal Stability of Airplanes, William Jenney. 43
Engineering Applications of Boundary Layer Control, Raymond B. Maloy 407
The Helicopter: Propulsion and Torque, Haviland H. Platt 398
Induced Velocity by Helical Vortices, Sandi Kawada 86
Investigations of Velocity Fluctuations in a Turbulent Flow, F. L. Wattendorf 200
The Kinetic Energy of a Body of Revolution Moving in an Infinite Fluid, Carl Kaplan 381
Lateral Control Design, Arthur G. B. Metcalf 393
Longitudinal Potential Flow about an Arbitrary Body of Revolution with Application to the Airship "Akron", Richard H. Smith. 26
Longitudinal Stability of a Bi-Motor Transport Airplane, Clarence L. Johnson 1
A Method of Air Flow Cinematography Capable of Quantitative Analysis, H. C. H Townend 343
Model Experiments on Flutter at the Massachusetts Institute of Technology, Manfred Rauscher 171
A Note on Fuselages of Low Drag, Shatswell Ober and J. R. Markham 276
Operator Solutions in Airplane Dynamics, Alexander Klemin and Benjamin F. Ruffner. (Digest of article is on page 179). 252
Orthoplane Theorems, A. F. Zahm 329
The Pasadena Junior College Wind Tunnel, A. A. Merrill 366
On the Representation of a Ground in the Wind Tunnel, Masami Ono 40
On the Separation of Turbulent Boundary Layers, H. Peters 7
Span Load Distribution on a Tapered Wing as Affected by Partial-Span Flaps from Tests in the Full-Scale Tunnel, John F. Parsons 161
Spinning and Tail Buffeting Tendencies and Means by Which They Can Be Detected and Suppressed on a Complete Scale Model in a Wind Channel, William E. Hunt 444
On the Stalling of Highly Tapered Wings, Clark B. Millikan 145
Stalling of Tapered Wings, Richard H. Smith 97
Study of Mixing Between a Jet of Fluid of Various Densities and Still Fluid, H. Peters and J. Bicknell 179
A Survey of Aerodynamics, Clark B. Millikan 173
A Survey of Aerodynamics, Theodore Theodorsen 173
A Survey of Aerodynamics, (Experimental Techniques for Studying Turbulent Air Flow), Hugh L. Dryden 173
Tests on Ventilation Openings for Aircraft, F. Rokus and Th. Troller 203
A Theoretical Calculation of the Laminar Boundary Layer Around an Elliptic Cylinder and its Comparison with Experiment, Clark B. Millikan 91
Trends in Longitudinal Stability, Otto C. Koppen 232
Wind Pressures on the Akron Airship Dock, W. Klemperer and K. Arnstein 88
Wind Tunnel Tests on a High Wing Monoplane with Running Propeller, J. S. Russell, H. M. McCoy, and C. B. Millikan (Parts 1 and 2) 73, 79

AST 9200 .505 v.3, copy 2

AFRICANO, ALFRED. The Design of a Stratosphere Rocket 287
Air flow cinematography, a method of, capable of quantitative analysis 343
Air navigation, notes on the dust storms of the spring of 1935 with particular reference to airplane weather observations and 52
Airship " Akron ", longitudinal potential flow about an arbitrary body of revolution with application to 26
Airship dock, Akron, wind pressures on the 88
Airship, the large commercial, the field of 358
Airspeed meter, the effect of tubing on the indications of an 165
Air spoiler, an 291
Air Transport —
High Altitude Problems, Michael E. Gluhareff 154
High Altitude Transport, W. C. Rockefeller 234
Methods of Cabin Supercharging and Their Necessary Control Systems, A. L. Klein 58
Problems of the Transoceanic Airplane, I. I. Sikorsky 318
The Field of the Large Commercial Airship, Karl Arnstein 358
ALEXANDERSON, E. F. W. Radio Echo Altitude Meter 316
ALLEN, E. T. Discussion on " Propeller Advances " 144
Altimeters, sensitive, use of barometric pressure for setting in airport and airway traffic control 176
Altitude meter, radio echo 316
Annual meeting, fourth, of the Institute of the Aeronautical Sciences 109
ANTZ, HANS M., AND ROLAND J. WHITE. Tests on the Stress Distribution in Reinforced Panels 209
ARNSTEIN, KARL. The field of the Large Commercial Airship 358
ARNSTEIN, KARL, AND W. KLEMPERER. Wind Pressures on the Akron Airship Dock 88
ASTIN, A. V., AND L. F. CURTISS. A Practical System of Radiometeorography 35

Balloon fabrics, rubber substitutes as coatings for 63
BEAKLEY, WALLACE M., AND WARREN S. PARR. An Investigation of Duraluminum Channel Section Struts Under Compression. 21
Beam column, tapered, analysis for uniformly distributed loads 364
Beams, box, metal sheet covered, transfer of stress from main beams to intermediate stiffeners in 426
Beams, continuous, graphical calculation for 229
Beams under combined side and axial loads, a note on 332
BENTLEY, G. P., and C. S. DRAPER. Measurement of Aircraft Vibration During Flight 116
BICKNELL, J., and H. PETERS. Study of Mixing Between a Jet of Fluid of Various Densities and Still Fluid 179
BIERMANN, DAVID. Compromises in Propeller Design 142
Bi-motor transport airplane, longitudinal stability of 1
BIRDSEYE, C. H. Map Reproduction 324
Blind flight, true 168
Body of revolution, kinetic energy of a, moving in an infinite fluid 381
Body of revolution, longitudinal potential flow about an arbitrary, with application to the airship " Akron " 26
